Stay Safe Online { Prevention Checklist}

1. Use strong and unique passwords for every account (avoid using your name or DOB).
2. Enable **two-factor authentication (2FA)** wherever possible.
3. Never share OTP, UPI PIN, or bank details with anyone — even if they claim to be from the bank. *(UPI Safety)*
4. Always check before approving any **"collect request"** on UPI apps — receiving money does NOT require a PIN. *(UPI Safety)*
5. Avoid clicking on unknown links or downloading files from untrusted sources.
6. Keep your apps and phone software updated to stay protected from security threats.
7. Limit what you share on social media (location, phone number, personal details).
8. Use only trusted Wi-Fi networks; avoid logging into accounts on public Wi-Fi.
9. Log out from shared devices after use.
10. If something feels suspicious, pause and verify before taking action.

Report Cybercrime:

1. National Cyber Crime Portal: https://cybercrime.gov.in
2. Helpline Number: **1930**

Reflection: While researching cybercrime, what surprised me the most was how easily people can be manipulated through fear and urgenncy. Many scams do not rely on advanced technology but on simple human emotions like panic and trust. I realized that even educated people, including students, can fall victim if they act without thinking carefully.

One habit I will personally change is being more cautious before clicking links or responding to unknown calls or messages. Earlier, I sometimes acted quickly without verifying the source, but now I understand the importance of pausing and checking authenticity. I will also make sure never to share sensitive information like OTPs or PINs with anyone. Staying alert, calm, and informed is the best way to stay safe online.
